💼 WORK EXPERIENCES

Backend and iOS Developer / IT Manager
Zarco, Portugal   Nov 15 - Aug 16

Was given full responsibility for technical management and strategy on the creation of the On-Demand solution (Android, iOS, Dashboard, RESTful API and business model). Established a software development life cycle to assure the quality of all features. Held team meetings, prioritized tasks and kept tracking progress. Was also able to provide "mentorship," as it were, if the developers on my projects got stuck. Introduced and implemented agile methodology Kanban, and implemented corporate Wiki for content management and collaboration.

Simultaneously, I was part of the iOS App (Swift) developers, RESTful API lean developer and the model business (PHP based MVC framework). The installation and maintenance of servers were also in my duties (hosting provider Amazon AWS EC2).

Key technologies: PHP, Swift, RESTful API, AWS S3, Facebook SDK, GCM Cloud, APNS, Stripe, Alamofire.

IT Project Manager
Nomadmovement, Portugal   Fev 16 - Jun 16

As Project manager, was responsible for refactoring architectural guidance, recommendations, mentoring and training where necessary. Organize all the necessary meetings with the team to share with them objectives and plan project sprints. Supported development and software quality assurance to ensure product stability for end users.

iOS Mobile Developer in Mobile Summer Academy
Porto Tech Center, Portugal   Jun 15 - Aug 15

This Mobile Summer Academy is an intensive 10-week program for IT Students to learn how to create iOS mobile apps. During the Academy i had the opportunity to build a native app from scratch, integrated in an experienced Agile team following Scrum methods.

Web Developer
NomadMovement, Portugal   Mar 15 - Jul 15

The purpose will be to change the maps system allowing several place markers to reflect the full journey experience, with a special attention to the user experience.
The technologies used for this goal were Google Maps API, Jquery, PHP, Ajax.

Programmer
Portuguese Armed Forces, Portugal   Jan 13 - Sep 13

Was responsible for the creation of a software system to control all IT equipment both in the aspect as logistics as the IT helpdesk for the Military Facilities in the Area of Porto.
Besides that also helped IT staff in the daily problems.

Head of Team Telecommunications and Cryptographic
Portuguese Armed Forces, Portugal   Apr 09 - Jan 13

Was responsible for a team with the purpose of forwarding telephone calls and receiving messages in classified channels.
